

**Submission form for genome size in the Asteraceae
GSAD: a genome size in the Asteraceae database**

Please, fill all the fields you have data for and use one form per species or infraspecific taxon. Genome size data will not be shown until it is finally published (the authors are kindly asked to provide the publication when it is released). The assessed taxa, however, will appear as “publication pending” at the GSAD database (unless otherwise indicated by the authors). If data come from an already published paper, please provide it together with the forms.

Thank you very much for your collaboration with the GSAD database.

SUBMISSION FORM FOR GENOME SIZE INFORMATION IN THE ASTERACEAE: NEW DATA

GENUS:

SPECIFIC EPITHET, INCLUDING AUTHORITIES:

INFRASPECIFIC EPITHET, INCLUDING AUTHORITIES:

OTHER SPECIFICATIONS (population name, strain, cultivar name, etc.):

PLOIDY LEVEL:

CHROMOSOME NUMBER ($n/2n$):

GEOGRAPHICAL DATA (of the population studied):

GENOME SIZE (1C/2C in pg):

LIFE CYCLE (ANNUAL / BIENNIAL / PERENNIAL):

HABIT (HERBACEOUS / WOODY):

WEED (YES/NO):
